

Carbon Filter and Seal Installation Instructions

Carbon Filter:

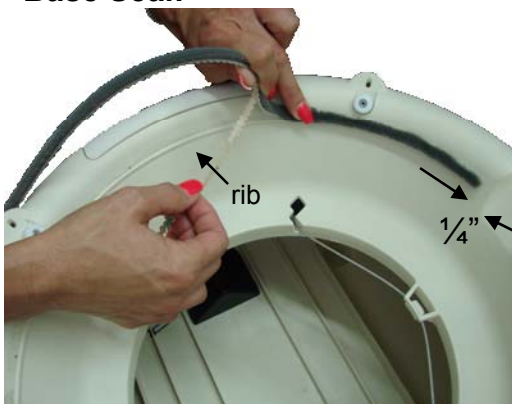

To Install: Tuck the top corner under the lip of the drawer (left). Then slide the filter upward. The carbon filter, when installed, should look like the picture to the right.

To Remove: Grab the bottom corner of the filter and pull the filter down, away from the drawer step.

Base Seal:

Base Seal Installation for base with Rib: Peel back the protective strip and place the base seal strip above the rib (left). Then, press down firmly on the base strip. The base seal strip should look like the picture to the right when installation is complete.

Base Seal Installation for base without Rib: Cut out the template on the reverse side of this sheet and place it on the base as shown (left). Make frequent marks around the base. Peel back the protective strip and place the base strip above the line you have created (right). Lastly, press down firmly on the seal strip.
